

AKTHEM MEFTAH

Engineering Student — Data Science & Machine Learning

CentraleSupélec · Gif-sur-Yvette, France

✉ akthem.meftah@gmail.com | ☎ +33 6 25 66 72 02 | linkedin.com/in/akthem-meftah

PROFILE

First-year engineering student at CentraleSupélec (top-ranked French Grande École), with a strong mathematical foundation from a competitive MP preparatory program. Self-driven and fast-learning, currently deepening expertise in Machine Learning and Deep Learning through independent study (Hands-On Machine Learning, Aurélien Géron). Seeking a long-term internship in Data Science or ML at an innovative international organization.

EDUCATION

CentraleSupélec

Gif-sur-Yvette, France

MEng in Engineering — Major: Data Science & AI (planned)

2024 – 2027

- ▶ One of France's top engineering schools (ranked #1–2 nationally), part of Université Paris-Saclay (#14 worldwide, QS 2025)
- ▶ Rigorous curriculum in applied mathematics, algorithms, statistics, signal processing and optimization
- ▶ Active member of Automatants, the school's AI & ML student society

Classe Préparatoire MP

Paris, France

Mathematics & Physics — Lycée Saint-Louis, Paris

2022 – 2024

- ▶ Highly selective two-year program preparing for France's top engineering school entrance exams (Grandes Écoles)
- ▶ Deep training in advanced mathematics (analysis, algebra, probability), physics and computer science
- ▶ Developed exceptional problem-solving skills and intellectual rigor under high-pressure conditions

TECHNICAL SKILLS

Languages: Python (NumPy, Pandas, Scikit-learn), SQL, C (basics)

Tools: Git, Linux, Jupyter Notebook, VS Code

Currently Learning: Deep Learning (PyTorch), CNNs, MLPs — reading HOML (Géron)

ML / AI: Supervised Learning, Random Forest, Linear Models, Neural Networks (learning)

Mathematics: Linear Algebra, Calculus, Probability & Statistics, Optimization

Languages: French (native) · English (C1, professional) · Arabic (conversational)

PROJECTS

Titanic Survival Prediction

Personal Project

Machine Learning · Python, Pandas, Scikit-learn

2024

- ▶ Built a binary classification model using Random Forest to predict passenger survival on the Titanic dataset

- ▶ Performed data cleaning, feature engineering and hyperparameter tuning — achieved competitive accuracy

House Price Estimation

Personal Project
2024

Machine Learning · Python, Scikit-learn

- ▶ Developed a regression pipeline using Linear Regression and cross-validation on real estate datasets
- ▶ Applied feature scaling, outlier handling and model evaluation metrics (RMSE, R²)

EXTRACURRICULAR & VOLUNTEERING

Mathematics Tutor

Paris, France
2024 – Present

Volunteer Teaching — MPSI student, Lycée Saint-Louis

- ▶ Provide weekly one-on-one tutoring in advanced mathematics to a first-year preparatory class student
- ▶ Developed structured teaching materials and pedagogical methods to make complex concepts accessible

Automatants — AI & ML Student Society

Gif-sur-Yvette, France
2024 – Present

Member, CentraleSupélec

- ▶ Joined the school's main AI community to network with peers and follow ML research developments

ADDITIONAL INFORMATION

Nationality:	Tunisian — French residency · Work authorization: EU (valid for internships)
Availability:	Available for long-term internship (4–6 months) from Summer / Fall 2025
Interests:	AI research, competitive ML (Kaggle), mathematics, pedagogy & teaching
